- All images should be layed out at actual size
- Please determine the appropriate resolution from the chart below
- When saving your file, please choose Photoshop EPS format from the dropdown list
- After clicking save, please enter the settings below in the EPS options window. . .

RECOMMENDED PRINTING RESOLUTIONS		
Print Size	Avg Viewing Distance	Resolution
0-3 sq. ft	3 ft.	300-600 dpi
4-12 sq. ft	8 ft.	150-300 dpi
13-32 sq. ft	16 ft.	80-200 dpi
32+ sq. ft	32 ft.	75-150 dpi

Resolutions are dependant upon your application and it's viewing distance

Please do not submit .jpg compressed or low resolution .bmp bitmapped files as the quality of these file formats does not lend well to the extreme enlargements required to produce signs.
