

**Mobile Advertising.
Eye-Catching Appeal.**

Let your vehicle be the backdrop to your most successful ad campaign.

Travel into the view of potential customers instead of waiting for them to see your television commercial or run across your newspaper ad. You can reach out to customers over all the roads your vehicle or fleet of vehicles travel. The marketing possibilities from mobile exposure are nearly endless.

Using award winning designers, cutting edge equipment and technology, and experienced vinyl applicators, Ace Sign Co. can turn your vehicle into your most visual and cost effective marketing tool! We have a variety of applications that can fit your needs. This guide will help determine your budget based on your vehicle type and coverage desired.

High Visibility

Your business keeps you and your employees on the move. Vehicle graphics will be seen by drivers and pedestrians!

Works for You

Your ad is always “on”, 24/7/365. Passing drivers won’t pay much attention to a plain white van on the road, but they will notice a well-designed vehicle graphics package.

Non-Aggressive Advertising

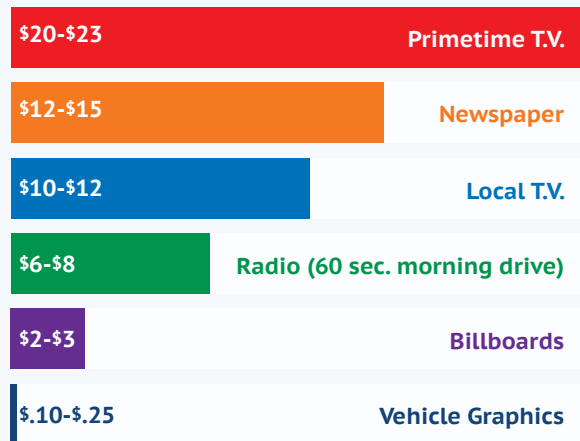

Unlike radio or print ads, vehicle wraps attract attention without disturbance. Customers respond better to advertising that doesn’t take an “in-your-face” approach.

Local Advertising

People like to deal with nearby and local businesses. Vehicle graphics are designed to target your local market, because the people who will see your vehicle the most are already in your area of service.
