

ProEdge Slim | A solid cut, sleek, low-profile letter precision cut with uniform edge lighting through a bevel cut acrylic backer. These letters are ideal for small to medium scale letters with close-up viewing, for interior or exterior use.

Tags: exterior, interior, low-profile, close-up viewing, high-end, classy, versatile, lobby logo, economical

ProEdge Solid | A premium solid cut sleek letter precision cut with a perfectly flush edge lighting through a thick white diffused acrylic backer. These letters are ideal for medium to large scale letters, for exterior or interior use.

Tags: exterior, interior, diffusion, precise, premium, high-end, classy, versatile, lobby, storefront

ProFace | A vibrantly illuminated low-profile letter, precision cut with a trimless acrylic face. These letters are ideal for small to medium size letters with close-up viewing, for interior use.

Tags: interior, brightness, trimless, precise, premium, low-profile, lobby

ProHalo Welded | A hollow fabricated letter from heavy gauge aluminum, containing LED illumination which escapes the back of the letter and floods the building surface. These letters are engineered and built for large scale applications at any elevation, for exterior use.

Tags: Exterior, large scale, High Rise Buildings, Wind Resistance, long-distance visibility, elegant

ProHalo Solid | A solid cut routed letter from a high density urethane board with embedded LED lighting directed at the building surface. Our unique solid letter construction provides superior efficiency and flexibility in design, with uncompromised durability. Routed in standard depths of 1-½ inch or 2 inch, including prismatic or beveled face cuts. These letters are ideal for medium to large size applications for exterior use on non-reflective, light colored surfaces.
